

October 21, 1992

Mr. Kevin R. Stout
District Forest Manager
Georgia-Pacific Corporation
P. O. Box 218
Prosperity, SC 29127

Dear Kevin,

As required by the lease agreement with Georgia-Pacific, Nevada Goldfields is submitting an activity report concerning NGI activity on leased ground.

As reported in our September 1, 1992 letter, soil sampling was performed on the self anomaly to verify some old Amselco data. Seventeen samples were obtained with disappointing results. Assay data is available at the NGI main office if needed. Current work on leased land includes expanding the grid system for soil sampling outside the areas sampled by Amselco. No surface disturbance is planned. This information will be updated in the fourth quarter report.

Sincerely,

Robert P. Rogero
Site Geologist
